IEPA/DLPC

Dear Mr. Chapel:

We recently received a letter from Keith Immo of the Office Of the State Fire Marshall (see enclosed copy) stating that they will no longer be requiring the presence of the IEPA contractor on site at the time of the removal of our underground storage tanks. At this time I would like to know if you are planning to have a representative of your office on site at the time of removal. In order to avoid any further delays in completing this project, I ask that you please respond in writing with the name of any representatives (if any at all) that you are sending to our underground tank removal.

I would like to thank you for your help in resolving this matter and I look forward to your response.

Sincerely,

John Manolas
